

PUBLIC TRANSPORT

Innovative Mobility

The need and demand for public transport services are increasing continuously. On the one hand, the number of city dwellers is rising. On the other hand, they want to get from A to B in the city more eco-consciously and especially faster and more conveniently. In this case, it is important to keep up the pace with the requirements of today's times.

SKIDATA's access solutions in the public transport sector not only offer many opportunities and advantages for operators – residents and visitors of the city benefit from alike. Set new trends and turn your city into a mobile experience!

Step into the Public Transport Solution by SKIDATA

Experiencing Mobility Within the City

Let your city residents experience mobility in a simple and convenient way. SKIDATA provides you with the complete service for a safe and quick pedestrian access: hardware, software and ticketing from one single source! For you as an operator, the public transport access solutions by SKIDATA particularly stand for quick and cost-efficient installation, as well as system maintenance. Various security aspects prevent ticket abuse and additional services support your administration efforts as well as reporting.

City residents are always up-to-date and, hence, also acquainted with the latest technologies. Meet them halfway and provide them with state-of-the-art access using e-ticketing and mobile ticketing. Or connect your public transport solutions with superordinate city solutions: By using this, your customers can park, use public transport and get fast access into the stadium with only one ticket. SKIDATA solutions make all this possible.

Your Benefits at a Glance

The Most Modern Access System

- The latest ticketing method applications such as RFID (incl. NFC), mobile ticketing, Print@Home, 2D Barcodes etc.
- Proven security: All deployed components have been tested extensively for security and reliability in the most various environments.
- Access as your company's business card: The Vario.Gate is also available in your company colors.

Your Business at a Glance

- Customer-specific evaluations and statistics at the touch of a button.
- Easy and quick configuration modifications within seconds even during operation.
- Always informed: Automatic information, individually configurable, is sent to the administration platform or to handhelds and also directly to a pre-defined email address.

Integration of Third-Party Solutions

- Open system interfaces to connect external solutions such as cash systems, CRM or ERP applications.

High Level of Customer Convenience

- Multi-channel ticketing: Simultaneous ticket reservations via various distribution networks.
- Innovative, flexible and future-proof readers with a central scan position for more comfort and speed during entry.

Cost-Efficiency

- Solid hardware with low maintenance requirements.
- Decreased staff requirements due to an easy and centralized system, e-commerce platforms and ticket machines.
- Also possible as an online solution. No IT infrastructure necessary on site and cheap running costs – thanks to hosting the solution at SKIDATA's server center.

Future-Oriented

- Possible integration into superordinate city solutions.
- The ticketing from tomorrow: e-ticketing, mobile ticketing.
